Professional Summary

Innovative Full-Stack Developer with 4+ years of experience architecting high-stakes web applications, real-money gaming platforms, and cross-platform mobile apps. Expert in Vue.js, TypeScript, and Laravel ecosystems. I enhance traditional engineering with agentic AI coding skills, utilizing Claude Code, Ollama, and GLM to drive autonomous development and operational efficiency. A proven mentor in fast-paced environments, I excel at bridging the gap between complex game engine mechanics and scalable, enterprise-grade backend architectures to ship revenue-generating products.

Technical Skills

Languages	Javascript, Typescript, PHP
Front End	Vue.js, React, Angular, Nuxt.js, Next.js, Astro, TailwindCSS, PrimeVue, Vuetify, Bootstrap, jQuery, NuxtUI

A.I.	Claude Code, Claude API, Gemini Flash, Cursor, GLM, Ollama

Experience

IT Americano Inc.

Mid Front End Game Developer

Eco Plaza Chino Roces Ave, Makati City • January 2025 – Present

- Ship client-specified web-based games using Laya Air and Cocos Creator, delivering responsive, low-latency gameplay on an active real-money betting platform
- Drive UI/UX feature rollouts on the betting frontend, improving platform usability and player retention
- Optimize and harden game systems for stability and cross-browser compatibility, reducing production issues under live traffic

Las Casas Gaming Inc.

Senior Full Stack Developer

Victoria Sports Tower, Quezon City • July 2023 – January 2025

- Designed, developed, and launched end-to-end web games with full gameplay mechanics and interactive UI on a live real-money platform serving active players
- Architected and maintained in-house operational systems supporting clients and affiliate partners, reducing manual overhead across business workflows
- Engineered cross-platform mobile applications using Ionic and React Native, delivering consistent UX across iOS and Android
- Secured and scaled the online betting platform, sustaining uptime and a smooth player experience under continuous live traffic
- Mentored junior developers through code reviews and pair programming, accelerating team skill growth and code quality

Mutual Success Lighting Fixtures Inc.

Full Stack Developer

Tekite Tower, Ortigas Center • March 2022 – July 2023

- Maintained and extended an enterprise ERP system supporting daily company operations with zero critical downtime
- Designed new ERP modules for internal teams and external clients, improving business process efficiency across departments
- Resolved tier-2 technical support issues, keeping employee productivity uninterrupted during system incidents
